### III. SUPERVISED AGRICULTURAL EXPERIENCE

Without a well supervised agricultural experience program for agriculture students, instruction becomes academic rather than vocational. The instructors of agriculture are responsible for making agricultural experience a valuable and realistic experience to enhance classroom and laboratory instruction. Without close supervision and adequate on-site visitations by the instructor, the students are being denied a very important phase of their total instructional program. The desired number of visits per instructor is 180. In 2021-22 the average number of SAE visits per department was 211

#### 2022 SAE VISIT TOTALS IN MISSOURI

District	Schools Reporting	District Average Visits/Student	Total Visits	At School	On Site
South Central	42	2.9	10786	7185	3601
Southwest	71	2.91	18956	11797	7159
